Senior Patent Data Analyst / Project Manager

Questel is a worldwide leading provider of intellectual property solutions. We offer a collection of unique databases and a comprehensive software suite for searching, analyzing and managing inventions and IP assets. Questel supports its clients throughout the IP lifecycle offering prior-art searches, patent drafting, international filing, translations, and support during licensing negotiations and litigation. These solutions, when combined with our IP cost management solution, delivers clients an average savings of 30-60% across their entire prosecution process. Established in 1978, Questel provides a true one-stop IP shop to more than 3,000 clients and 1M users across 30 countries.

MISSIONS

You will be part of our project Co-ordination Team.
The main tasks: analyzing Patent data, managing the contact with our providers, having a coordinator role between the different departments.
