"Into technology, out-of-the-box!"

REYNAERS

GROUP

Reynaers is a Belgian family company and worldwide **leading specialist in the development & design of innovative and sustainable architectural applications in aluminium and steel** determining the soul of a building, going from complete façades over doors, verandas, sun screenings to integrated solar systems.

"Together for Better" is the corporate motto: Reynaers permanently delivers to its partners a solid advisory service, with **focus on technological innovation, automation and digital transformation** (see [video link](#)). The most known brands of the international Group are Reynaers Aluminium and Forster Steel Systems. The Group counts 2200 collaborators active in more than 70 countries and had a turnover of € 580 million in 2019. For its HQ's in Duffel (Belgium), Reynaers relies on Graphene international to find a:

Intellectual Property Expert in Building Industry

Mechelen area

Job content

On Group level, you organize and manage IP-related topics, which includes following responsibilities:

- Organize and follow up the procedures for the application/granting of Reynaers patents;
- Support your colleagues with patent searches/patent analyses within the framework and as preparation of research projects and advise about freedom to operate;
- Organize a patent watch to follow up newly published patents in our sector to detect possible threats and opportunities;
- Supporting the individual researchers and interdisciplinary teams;
- Organize and follow up the registration of Reynaers' brand names;
- You work closely together with a patent agency for the formal parts and you are the direct link between the patent agency and the R&D department;
- You participate in engineering research projects on natural ventilation, safety, thermal insulation, strength, energy performance of buildings and acoustics. You are closely involved in ongoing projects;

- You follow market trends (passive construction, low energy construction, ventilation,...) and make proposals for research projects;
- You regularly follow training courses, both internally and externally, so that you are always up to date with new developments and technologies.

Your profile :

- You have a Master's degree in a technical field, ideally in material sciences, civil engineering or mechanics;
- You have proven experience in intellectual property rights and regulatory guidelines;
- Prior experience in building industry is a real plus;
- You enjoy linking theory with practice;
- You are organized and methodical;
- You work in an accurate and structured way;
- You like to collaborate with different departments within the company, in a multicultural environment;
- You express yourself fluently in English.

Offer :

- A state-of-the-art & international working environment in a company that is a worldwide leader in its field and where permanent innovation is the common driver;
- Furthermore, Reynaers provides a specific training programme that will enable you to thoroughly manage all aspects of your function. This training programme can be widened afterwards with additional trainings on new systems;
- Finally, Reynaers offers you future career opportunities and an attractive salary package with extra-legal advantages.
